

Making workplaces safer

Why your business needs WSO

- Proactive management solution to keep your employees safe
- Automates OHS processes
- Improves visibility of high risk hazards and incidents
- Scalable to change as per your business requirements
- Intuitive dashboard analytics and audit trails
- Mobile App: capture incidents and hazards on the go on Mobile
- Improves integration between OHS and ERP/HR systems
- Assists with OHS compliance

WorkSafeOnline (WSO) is a comprehensive, integrated Workplace Health and Safety solution to help drive safety and compliance throughout your business.

WSO replaces spreadsheets, manual forms and disparate databases with a single safety management system, making it easier to keep track of hazards, incidents, injuries, scheduled audits and inspections and much more.

By supporting government regulations and standards WSO will help drive safety throughout your business. It is completely agile giving customers the flexibility to change as per business needs. Customers can use as many or as few modules as required.

WSO consists of the following modules:

- ★ Hazard Management, Risk Register, Audits & Inspections, Behaviour Based Safety
- ★ Incidents, Investigations & Action Management
- ★ Injury Management, Return to Work & Claims Management
- ★ Safety Permits & Job Management (JSA)
- ★ Projects & Contractor Management
- ★ Induction, Training & Document Management
- ★ Environment Modules: Waste Management, Monitoring, Resources
- ★ Management of Change & Compliance
- ★ Minutes of Meeting, Innovation, Emergency Control, Material Safety Data Sheets

Our Clients

“WorkSafeOnline provides a holistic approach to manage HSE practices whilst improving the efficiencies of internal processes”

NSW Environment & Heritage

“WSO provides visibility to hazards and incidents in the plants and helps us manage risk.”

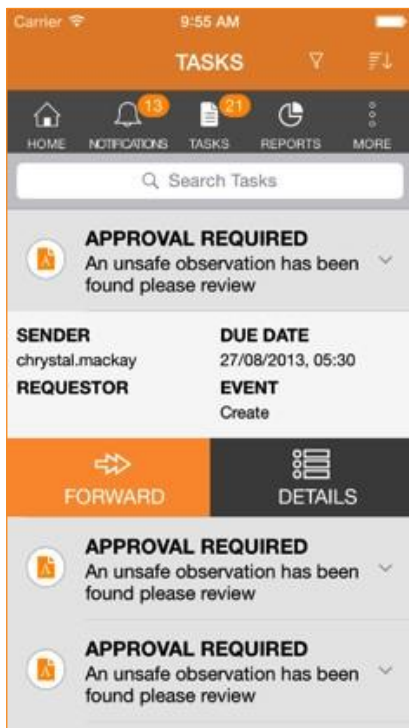

Utilities Company
